- Floats will be displayed at the 2012 Kiwanis International Convention in New Orleans, where judging will take place.
- A completed entry form must be submitted with each contest entry.
- The float should be decorated to display the contest theme.
- The float should be built within contest-specified dimensions.
- Floats will remain the property of Kiwanis International.

Float themes

This year's [themes](#) are related to The Eliminate Project: Kiwanis eliminating maternal and neonatal tetanus:

1. Protect the connection between mothers and babies
2. Create a touching moment
3. Join the response team
4. Honoring heroic hearts

Review the themes in the contest [idea kit](#), where each is explained in greater detail and cut-outs are provided. The cut-outs can be used as float decorations—but they're not required. Let them inspire creativity, not limit it!

Float dimensions

- The shoebox float must be made of a cardboard shoebox no larger than 13" x 9".
- A completed decorated float should not exceed 15 inches in height.
- Do not place the shoebox on a piece of cardboard larger than the shoebox.
- Do not decorate the float with anything that is edible.
- Do not create a diorama float using the inside of the box.

How to make a shoebox float

- Place the large part of the shoebox upside down and attach the lid of the shoebox at one end.
- Paint the boxes, or cover with paper and decorate.
- Below are photos of examples of how a shoebox float is constructed.
